Profile

- Currently reading for a BA in theology at Wycliffe Hall, which is an evangelical theological college and a permanent private hall of Oxford University
- My wife and I are Mission Partners of the Good Shepherd Mission church in Bethnal Green, London, where I was a member of the Cross-cultural Mission Group, the Preaching Team, and the Leadership Team (within which I was the Treasurer)
- Previously the short gilt market maker at Barclays Capital, covering outright gilts and asset swaps
- Previous experience in analysis and software development, investment banking (commodities and fixed income front office trading systems), and academic IT
- A first in Computer Science, a Commerce degree, and a DPhil in Computer Science

Employment

Barclays Capital (London), GBP Rates Trading (Sep 2004 – Sep 2010)

- The short gilt market maker from Jan 2007, with a consistent profit and market share track record
- Two years of experience as a junior interest rate swap trader
- Involved in a range of projects, including improving electronic trading, building client relationships, IT projects, and counterparty risk

Barclays Capital (London), Rates IT Development (Oct 2003-Sep 2004)

- Worked on eT, Barclays Capital's Fixed Income electronic trading platform
- Developed trading access to the Liffe financials exchange and maintained other ECN gateway and trade capture components, developed an automatic futures trading component, developed new GUI components and maintained existing components, and integrated a rules engine to eT
- Technologies included C++, Java, scripting languages, ION MarketView, TIBCO SmartSockets (Talarian), IBM MQ, Rational Clearcase, Rational ClearQuest and TogetherSoft Together for C++, Apama

Barclays Capital (London), Commodities IT Development Team (2000-2002)

- Developed a new web-based front office trading system to replace existing paper deal entry; system handles base and precious metals trading on various markets
- Business results: trading volume doubled while operations staff reduced
- Retained as a consultant during my PhD (full time Jan-Sep 2000 prior to PhD)

Software development and system administration positions in New Zealand during undergraduate study 1995 – 1999

- Statistics Department, University of Auckland (Nov 1998 – Dec 1999) – development of cross-platform statistical computing software in C
- D.F. Mainland & Co. Ltd., an investment bank (Apr 1997 – Aug 1998)
- Dr. Alistair McNaughton, Mathematics Department, University of Auckland (Nov 1996 – Dec 1996) – development of optimisation software in C
- Auckland Alarm & Electrical: system administration and support (May 1995 – Oct 1996)
- Winstone Wallboards: Lotus Notes development (Dec 1995 – Jan 1996)
- Carey College: system administration and user support (1994 – 1999)
